

TZ MEDICAL EZ HOLDER

TZ Medical EZ Holder

The TZ Medical EZ Holder is a versatile device that acts as an anchor point to firmly hold catheters and lead wires in place during procedures. This innovative product will help reduce procedure time as well as improve the efficiency of EP cases and implants.

Holds your lines so you don't have to!

*TZ Medical EZ Holder
Part # CT-0010*

Product Features

- Helps prevent catheter movement during cardioversion, eliminating the need to re-position catheters after therapy is delivered.
- Holds the catheter in place for HIS Bundle or any evoked potentials.
- Frees up Physician's hands during ablation procedures.
- Will help reduce chances of lead dislodgement during implant procedures.
- Will hold any standard catheter or implant lead that is 4-12 French.
