

TZ MEDICAL SLIDE TUBE

TZ Medical Slide Tube

The TZ Medical Slide Tube is a textile-based device used to transfer and reposition patients with multi-use and disposable options. The proprietary fabric minimizes friction, which reduces risk and improves patient care and caregiver safety. The Slide Tube increases efficiency, while reducing costs associated with lateral patient transfer.

Safely and efficiently conduct lateral patient transfers without sacrificing patient comfort.

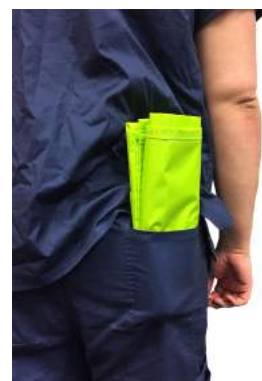

Multi-Use Slide Tube TZ-MU-58X40
Single Use Slide Tube TZ-ST-58X40

Product Features

- Can move up to 1200 lbs
- Meets no-lift policy and SPH protocols
- Easy to maintain and store
